

We are developing a town emergency preparedness plan in case of a disaster or other unforeseen problem. We are setting up neighborhood groups with captains for each area.

Following is an "Emergency Home Check List". We would like you to discuss this information with your family what you would do in the event of something happening. Please know where your gas, water and electrical shut offs are and how to shut them off if need be.

We are also encouraging each family to have a first aid kit that would take care of your family. If we all did this we will be better able to help each other. The town does not have the supplies.

Below is a list of supplies that is in each neighborhood captain's kit. Many have been interested in putting a kit like this together for their individual families. These supplies all fit inside the black w/ yellow lid tote you buy at Costco.

If you are interested in becoming CERT certified please contact the town or Kristin Johnson.

### Neighborhood Captain Kit

#### White gallon bucket

12 water bottles	4 – 13 gallon bags	3 – 30 gallon bags	75' nylon rope
